# WELL COMPLETIONS AND FOOTAGE DRILLED in the United States 1970-1982

**SECTION I:** Well Completions, By Months and By Years

**SECTION II:** Annual Well Completions, By States and By Areas

**SECTION III:** Annual Well Completions, By Depth Intervals

**American Petroleum Institute**
1220 L Street, Northwest
Washington, D.C. 20005

# PREFACE

Since 1970, the American Petroleum Institute has collected and published well and footage statistics for domestic drilling operations, for monthly, quarterly, and annual periods. During this fifteen-year period, these data were published in the month or quarter in which they were reported to the API.

In the late 1970s, the time span between the time the wells were actually completed and when they were reported to the API began to grow significantly. As a result, the date of publication began to seriously lag the actual well-completion date.

While steps were taken to address the time-lag problem, many of the factors affecting it are outside of the API's control. Thus, the API considered a number of alternatives for reporting this statistical series in a way which would be more useful to the data-user community. The result of these deliberations is that, beginning in January 1985, the drilling statistics will be published showing the month(quarter) and year in which the wells were completed regardless of the time frame in which they are reported to the API.

Because of the departure from the historical statistical series, the API has recompiled all the previously published data into the new timing format. This volume presents the monthly and annual well and footage information in the month and/or year in which the wells were actually completed, for the years 1970 through 1982.

The new "Monthly Completion Report" and the new "Quarterly Completion Report" will provide the same data for 1983 and 1984. Thus, users of these data will have a continuing, long-term series for analysis purposes.

Washington, D. C.
January 1985

# TABLE OF CONTENTS

| | | Page |
|---|---|---|
| Preface | | ii |
| Table of Contents | | iii |
| SECTION I: | WELL COMPLETIONS, BY MONTHS AND BY YEARS | |
| Part 1. | Total Well Completions | 1 |
| Part 2. | Exploratory Well Completions | 6 |
| Part 3. | Development Well Completions | 11 |
| SECTION II: | ANNUAL WELL COMPLETIONS, BY STATES AND BY AREAS | |
| Part 1. | Total Well Completions | 16 |
| Part 2. | Exploratory Well Completions | 42 |
| Part 3. | Development Well Completions | 68 |
| Part 4. | New-Field Wildcat Completions | 94 |
| SECTION III: | ANNUAL WELL COMPLETIONS, BY DEPTH INTERVALS | 107 |
| APPENDIX A: | FOOTNOTES | 120 |

See Appendix A for Footnotes.

## APPENDIX A:

FOOTNOTES

## SECTION I: WELL COMPLETIONS, BY MONTHS AND BY YEARS

1. The wells and footage shown are the cumulative total number residing on the API database, as of November 7, 1984, for each of the months and years presented. Data are subject to further revision as additional well information is received by the API.

2. Includes multiple completion wells which produce oil from at least one zone, but may produce gas from one or more zones. A multiple completion well is counted as one well.

3. Includes multiple completion wells which produce gas from all zones. A multiple completion well is counted as one well. Gas wells also include so-called condensate wells.

4. Includes stratigraphic and core tests and service wells.

## SECTION II: ANNUAL WELL COMPLETIONS, BY STATES AND BY AREAS

1. The wells and footage shown are the cumulative total number residing on the API database, as of November 7, 1984. Data are subject to further revision as information is received by the API.

2. Includes multiple completion wells which produce oil from at least one zone, but may produce gas from one or more zones.

3. Includes multiple completion wells which produce gas from all zones. Gas wells also include condensate wells.

4. May include discovery wells in offshore regions. In these areas, it is often deemed economically desirable to plug discovery wells drilled with mobile units and to subsequently drill development wells from a fixed platform. Under these circumstances, the actual discovery wells are counted as dry holes since the wells were plugged and abandoned. Therefore, caution should be exercised in utilizing data on offshore exploratory and new-field wildcat wells to determine the number of newly discovered fields.

   Footnote (4) is not applicable to development well table.

SECTION II (CONT.):

5. Each of the states which is subdivided into an "offshore" area includes wells which were completed in both state and federal waters adjacent to those states. Wells reported under the subdivision "Offshore Federal Waters" are not duplicative of wells reported in the "offshore" areas shown with the respective states.

   Additional descriptive information as well as maps outlining the various state and federal offshore areas is published in API Bulletin D12A, "The API Well Number and Standard State and County Numeric Codes including Offshore Waters," issued May 1982. This publication is available from the API Production Department, 211 North Ervay, Suite 1700, Dallas, Texas 75201.

SECTION III: ANNUAL WELL COMPLETIONS, BY DEPTH INTERVALS

1. The wells and footage shown are the cumulative total number residing on the API database, as of November 7, 1984. Data are subject to further revision as information is received by the API.

2. Does not include stratigraphic and core tests and service wells.

3. Wells are classified by depth intervals on the basis of the deepest total depth reported for each well regardless of the total amount of footage drilled. For the majority of wells reported, the deepest total depth and the total footage drilled are equal. However, for old wells drilled deeper and for new wells sidetracked out of an original hole to a new bottom-hole location, the total footage drilled will be less than the deepest total depth.
